

## **RNDr. Radek Macháň, Ph. D. – CV**

**Born:** 28/02/1982 in Liberec, Czech Republic

### **Contact information:**

**e-mail:** [radek82machan@gmail.com](mailto:radek82machan@gmail.com)

**Tel.:** (+420) 607 937 958

**Skype:** radek.machan

**web:** [www.researchgate.net/profile/Radek\\_Machan2](http://www.researchgate.net/profile/Radek_Machan2)  
[www.linkedin.com/in/radek-macháň-050a4846?trk=hp-identity-name](http://www.linkedin.com/in/radek-macháň-050a4846?trk=hp-identity-name)

### **Education:**

**2006 – 2012:** Charles University in Prague, Faculty of Mathematics and Physics.  
Ph.D. in Physics, specialization Biophysics, Macromolecular and Chemical Physics.  
Thesis: *Supported phospholipid bilayers and their interactions with proteins studied by ellipsometry, atomic force microscopy and confocal fluorescence microscopy.*  
Adviser: Prof. Martin Hof, DSc. J. Heyrovský Institute of Physical Chemistry of AS CR, v.v.i., defended 07/03/2012.

**2001 – 2006:** Charles University in Prague, Faculty of Mathematics and Physics.  
M.Sc. in Physics, specialization: Biophysics and Chemical Physics  
Thesis: *Comprehensive characterization of cellular suspensions by the means of elastic scattering of light.* Supervisor: Prof. RNDr. Josef Štěpánek, CSc., defended: 15/05/2006.

### **Praxis:**

#### **Since 09/09/2019: Senior Research fellow**

Singapore Centre for Environmental Life Sciences, Nanyang Technological University, Singapore

*Summary:* Managing Advanced Biofilm Imaging Facility - providing training and support to the facility users; assisting with experiment design, microscope operation, data analysis and interpretation; development of custom data analysis routines; maintenance and regular testing of equipment in the facility; participating in development of instruments and methods conducted by the group of Prof. Peter Török.

#### **01/09/2016 – 31/08/2019: Imaging scientist**

Imaging Methods Core Facility, Faculty of Science, Charles University in Prague

*Summary:* Providing training and support to the users of optical microscopy in the facility; assisting with experiment design, microscope operation, data analysis and interpretation. Development of data analysis programs. Participating in practical and theoretical training of students. Participating in methodological development conducted at the facility.

#### **15/04/2016 – 31/12/2016: Research assistant**

J. Heyrovský Institute of Physical Chemistry of AS CR, v.v.i., Department of Biophysical Chemistry, Laboratory of Prof. Martin Hof, DSc.

*Summary:* Building a total internal reflection fluorescence (TIRF) microscope and implementing imaging fluorescence correlation spectroscopy (FCS) in the laboratory of Prof. Martin Hof.

**01/01/2013 – 31/03/2016: Research fellow**

Department of Biological Sciences and NUS Centre of BioImaging Sciences, National University of Singapore. Laboratory of Prof. Thorsten Wohland, Ph.D.

*Summary:* Studying lipid bilayers and live cell membranes by imaging FCS with two main objectives: i) comparison of imaging FCS and fluorescence recovery after photobleaching by simultaneous measurements in lipid bilayers and live cells and ii) study of membrane receptor dimerization in live cell plasma membranes by means of dual-colour imaging fluorescence cross-correlation spectroscopy.

**01/04/2012 – 31/12/2012: Assistant professor and 01/12/2009 – 31/03/2012: Teaching assistant**

Czech Technical University in Prague, Faculty of Biomedical Engineering.

*Summary:* Preparing syllabus and teaching a course on "Fluorescence Spectroscopy and Microscopy in Biology and Medicine"; co-supervising student projects on ellipsometry and fluorescence spectroscopy.

**01/09/2006 – 31/12/2012: Research assistant**

J. Heyrovský Institute of Physical Chemistry of AS CR, v.v.i., Department of Biophysical Chemistry, Laboratory of Prof. Martin Hof, DSc.

*Summary:* Experimentally studying models of biological membranes (supported lipid bilayers, giant unilamellar vesicles) and their interactions with membrane-active peptides; main experimental techniques used were fluorescence imaging, fluorescence spectroscopy, fluorescence correlation spectroscopy and ellipsometry.

**Language skills:**

**Czech** (native speaker)

**English** (full professional proficiency)

**German, Spanish** (limited working proficiency)

**Malay** (beginner level)

**Computer skills:**

MS Office, Origin Pro, SigmaPlot, Matlab, ImageJ, Micro-Manager, LabVIEW, SVI Huygens

**Other qualifications:**

Class B (European) driving license
